#### How risky is it?

The value of the fund can go down as well as up. You could lose money.

One way to gauge risk is to look at how much a fund's returns change over time. This is called "volatility".

In general, funds with higher volatility will have returns that change more over time. They typically have a greater chance of losing money and may have a greater chance of higher returns. Funds with lower volatility tend to have returns that change less over time. They typically have lower returns and may have a lower chance of losing money.

#### Risk rating

PFSL has rated the volatility of this fund as **low**.

This rating is based on how much the fund's returns have changed from year to year. It doesn't tell you how volatile the fund will be in the future. The rating can change over time. A fund with a low risk rating can still lose money.

For more information about the risk rating and specific risks that can affect the fund's returns, see The Risks of Mutual Fund Investing section of the fund's simplified prospectus.

### A word about tax

In general, you'll have to pay tax on any money you make on the fund including your share of the fund's earnings and on taxable capital gains from redeeming your investment. How much tax you pay depends on your tax rate, whether or not you hold the fund in a registered plan and the type of earnings of the fund (interest, dividends, capital gains, etc.). In general, you do not pay tax on your investments held in a registered retirement savings plan, tax-free savings account or other registered plan.

If you hold your investment outside of a registered plan, you will receive a tax slip showing your share of the fund's earnings. You must include the amounts shown in your income whether you get them in cash or have them reinvested. You must calculate your taxable capital gains from a redemption.

### How much does it cost?

The following table shows the fees and expenses you could pay to buy, own and sell units of the fund.
